

Edward Jones Advisory Solutions® Fund Models Schedule of Fees

The Advisory Solutions Fund Models Fee is comprised of the Program Fee and the Platform Fee, net of any applicable fee reduction or fee offset. The Advisory Solutions Fund Models Fee is calculated by multiplying the applicable fee rate, which includes both the Program Fee and the Platform Fee, by the market value of all assets held in my Account (using the previous month's average daily balance). Edward Jones Reserve Line of Credit advances, if any, do not reduce the market value of my Account for the purposes of calculating the Advisory Solutions Fund Models Fee. The initial Advisory Solutions Fund Models Fee will be charged to my Account in the month following the date my Account was eligible for Advisory Solutions Fund Models based upon the number of days my Account was open during the month and based upon the average daily market value from the date my Account was accepted by Edward Jones through month end.

If the Services Agreement is terminated, the final Advisory Solutions Fund Models Fee will be assessed based upon the number of days my Account was open during the month and based upon the average daily market value using the prior day's price to determine a market value on the final day in order to calculate the closeout fee.
